Perfect disinfection

Velodes® Soap

Emulsion for hand and body washing

Application:

Velodes® Soap is an emulsion for washing hands, hair and the whole body. The product does not contain soap so it can be used by people with allergies and intolerance to soap-based products. Thanks to skin-nourishing ingredients, it is particularly recommended for medical personnel susceptible to skin maceration related to frequent hand washing. The emulsion is also recommended for patients with bedsores. Dermatologically tested.

Directions for use:

Hand washing: apply a small amount of the emulsion on wet hands and spread until it foams, then rinse with water.

Washing in the shower: spread the emulsion on wet skin and hair. Wash your body, and rinse under running water.

Washing in the bath: pour the emulsion into the bath filled with water. Wash your skin and hair, and then rinse under running water.

Ingredients:

anionic surfactants, amphoteric surfactants (coconut betaine), moisturizing substances (glycerol), fragrance composition.

pH 5,5-6,5
